

GIVE YOUR WORKFLOW THE **PRYOR** TOUCH

PortaDot 60-30 Touch

The World's most powerful lightweight portable dot peen marking machine.

The PRYOR PortaDot 60-30 Touch is the only handheld marking machine on the market with an integrated touchscreen for programming.

Extremely versatile, lightweight, and mobile marking machine with a marking window of 60mm x 30mm, powered by a Bosch 36V battery for 'all day' use.

Featuring patented technology to ensure that the marking force does not deteriorate as the battery power depletes, the brand new integrated control system has evolved from our already highly successful 4000 Series controller with the same functions and features, all packaged within the marking head for ultimate mobility.

Marking layouts can be created, edited, and saved directly on the marking machine using the 5.7-inch touch screen display - to easily locate and load whenever each is needed.

What's in the box

The PortaDot 60-30 Touch comes complete with a rugged carry case and a host of standard accessories to ensure you are ready for action.

- All-in-one marking solution with touchscreen control
- Uses Pryor's latest embedded control system integrated into the marking head
- All marking data backed up to internal storage with an option to export via USB
- 50mm x 90° stylus
- Spare 50mm x 120° stylus
- Bosch 36V battery
- Battery charger
- Country specific mains charging cable
- Robust carry case with precision cut foam inserts

Gear up your PortaDot 60-30 Touch portable marker

Extras available for delivery with or after you receive your PortaDot 60-30 Touch:

- **Additional 36V Bosch Battery**
To eliminate downtime while charging.
- **Facemask Extender**
Giving extra stability on contoured and awkward surfaces.
- **Bench Style Base and Column Mount**
To create a wireless benchtop marking system.
Ideal for marking small components and labels.
